

# CC-60 & 100

## Load Control Panel

The CC-60 and 100 series Load Control Panels are the most versatile control panels available. The CC-60 (4/8 circuit) and CC-100 (8/16 circuit) can be ordered as a bare panel (without circuit breakers and GFCI installed), or completely customized for your application. Our panels can be configured with up to 3 timers, Freeze Control, Air Switches, and **UPB** Remote Control Capability. The CC-60 is designed to handle circuit breakers for up to 3-240 volt circuits and 2- 120 volt circuits when Quad Circuit Breakers are used.

### Features

- Galvanized Steel and Powder Coated NEMA 3R Weatherproof Enclosure.
- CC-60 4 / 8 Load Center or CC-100 8/16 with interchangeable breakers.
- 100 amp Panel.
- 7 day programmable electronic clock with rechargeable battery backup.
- Optional Mechanical Timer.
- Knock Outs in dead front for up to 2 switch devices.
- Built in Weather Proof while in use cover for GFCI.
- Optional 2nd and 3rd timers available.
- Freeze Control Available.
- Additional Knock Out for device on exterior.
- Ample Knock Outs for conduit entries.
